JLA-Aborted Take-off/Diversion/Deviation. Aborted Take-off/Diversion/Deviation - Maintenance Control Mechanical Confirmation										
									RE (A/R)	JLAC
105 A/F						Mos				
	(NOTE: NOTE: Review and understand JLA GMM Section 8.11 before completing this task. This guidance is to be performed after an aborted Take-off/Diversion/Deviation which derived from a mechanical situation. For a mechanical situation that was declared as no discrepancy currently present, document under compliance notes the mechanical situation and the information used to determine the aircraft system is satisfactorily operational. For a discrepancy that was reset using authorized methods, document under the compliance notes the maintenance discrepancy, the reference of the reset procedures used (i.e. "AFM Procedures Page XX" or "Aircraft shutdown and before start checklist"), the pilot has confirmed system has been reset and is satisfactorily operational, the Crew Members name and ATP #, the Maintenance Control Center Controller's name and A&P number. If a discrepancy requires maintenance evaluation and/or repairs, do not comply with this task as the Crew is required to fill out an AMDL and submit to MCC.)					Hrs
